Current is a nonprofit news organization dedicated to covering public media in the U.S.

Whether you are a producer or distributor looking to boost your program carriage, a vendor or consultant working with public media organizations, or have an event you need to promote, Current is the best way to reach public media’s decision makers.

Current connects you to the people making public media happen.

Current will publish four newspapers in 2023, each with a special focus on a trend or topic that impacts the entire public media field. Current.org is updated daily with the latest developments that shape programs, policies, special initiatives, and news relating to the people that drive the industry.

SPECIALTY ADS

Grab readers’ attention and deliver a strong first impression with these key visual landing spots!

IN-STORE RIBBON:
Positioned after fourth and sixth paragraph of a feature story. Subscribers will see your embedded ad as they scroll through an article.

Looks great on desktop and adjusts to fit mobile nicely.

Content Targeting available!

SNEAKER:
This ad unit “sneaks” up from the bottom of the page. It takes one image, a title and a description. Reader needs to click on “close.”

The Sneaker is frequency capped to display two times to a reader in a 24-hour period.
Public broadcasters seek trusted vendors for a wide range of products and services that will help them succeed.

Current will deliver your online ad through our vendor, BroadStreet Ads, and report performance metrics following your campaign.
TERMS, CONDITIONS & FILE SPECIFICATIONS

PDF Settings & Resolution
Adobe PDF/X-1a:2001. All fonts and images must be embedded. Be sure the color settings of all elements are CMYK. Final files should be a minimum of 300dpi, and all images used in an ad layout should also be at least 300dpi.

Document Bleed Settings
Current’s press specifications do not allow for files to bleed off the page. Ads must be built to full size (100%) with no additional bleed built in.

Design Planning for Offset Web Printing
Web offset printing on newsprint is often less consistent across issues than magazines printed on heavier paper. Alignment (registration) issues are the most common problem, but can be avoided or mitigated by designing your ads with the final output in mind.

Color Builds and Ink Density
The guideline for maximum ink density for color build areas is a total of 220%. Please check your settings in ads that have four-color art, photos or single-color reversed areas. Color builds at a higher percentage will oversaturate the page and can result in uneven printing.

Output files as CMYK
All ads must be submitted as high-resolution CMYK files. Be sure that you have converted all RGB color images in a layout to CMYK before outputting your final file.

Protect your legibility
For small print (12 point or smaller) use black plate only (not a 4-color build). Likewise, avoid reversed / white type on a colored background as well as thin typefaces or other small type printed using multiple colors.

Color Matching
The final printed product may not match what your screen displays. PDFs and RGB files printed locally will show a different range of hues than CMYK inks printed on a commercial press. Spot or RGB colors will be swapped for the closest available CMYK build, which may result in unexpected color shifts.
